

General & Web

- User satisfaction Survey
- Aviso User Newsletter #9
- AltiKa 2013 workshop (presentations online)
- Gridded extraction service soon authenticated, using the same login/password than the FTP
- Opening of the Online Data Extraction Service (ODES, see dedicated poster) to OSTST member

Data & products

Dataset upgrades / updates

- Upgrades of Ssalto/Duacs NRT processing,
- Updates of Ssalto/Duacs DT
- Integration of Saral within the multi-mission datasets
- Regular updates of all other datasets (GDRs, CorSSH, wind/waves, MSL & ENSO indicators...)
- Use of weather forecast files in the DAC computation

New datasets distributed

- Saral (S)(I)GDR products
- FES2012 tidal heights and currents
- CTOH "Xtrack" regional along-track SLA products

Future developments

- New MDT (end 2013), using a longer reference period
- General opening of the Online Data Extraction Service (ODES, see dedicated poster)
- Complete Ssalto/Duacs DT reprocessing (see MI Pujol poster), using a longer reference period with a major simplification in the number of variants proposed, nomenclature rationalization, major changes also on format (CF-compliant for all datasets)
- CTOH products and information included in a new altimetry web portal (Aviso+)
- Opening of a new web portal (Aviso+)
- Regional "Experimental" products (MyOcean)
- Integration of HY-2 within the multi-mission (end 2013)
- FES2014
- Daily DT maps series cont'd and regularly updated
