# Confluence

## A cloud-ready engine for SWOT discharge

Single cloud platform to run any discharge algorithm. Enables diagnostics, comparisons, averaging, consensus, validation, integrators, and standardization. Since all algos have common inputs, cuts out redundant processing

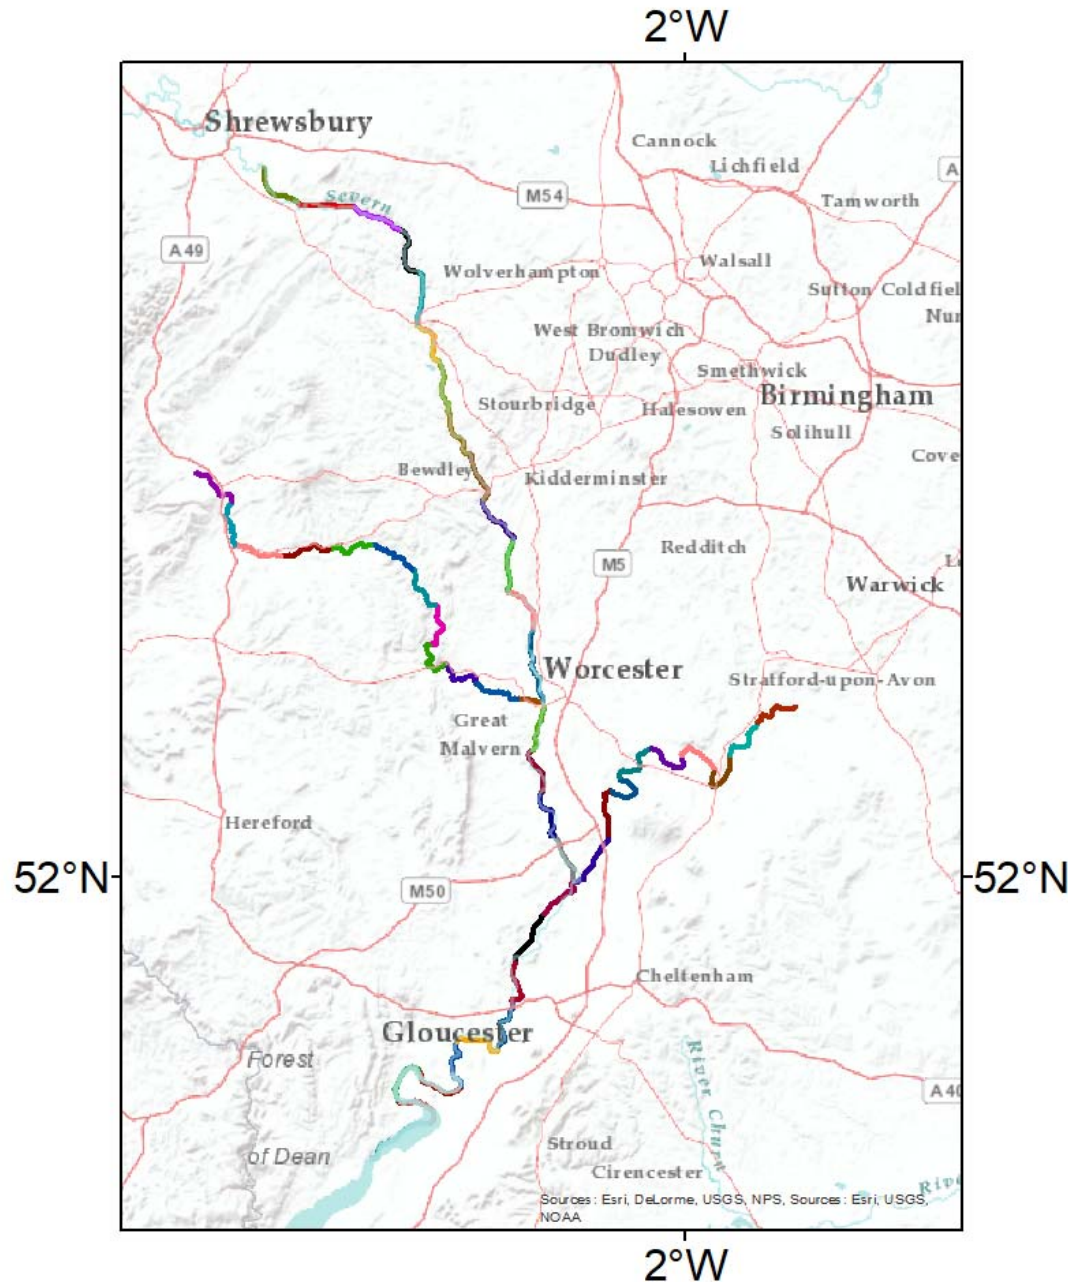

Efficient and license-free

# How it works

- We have a working version of all components
- Need more discharge algos. We can dockerize, or you can!
- Need more integrators, integrator ideas
- Need richer priors and diagnostics
- If you want to be involved, come find me!
- Public version by the end of the year
